TRAILER SET-UP

Our concession trailer is 8'x20'(frontage), with tongue and service space our needs are approximately 8'x 26'(frontage).

We need approx. 30amps of 110 power

(Regular 30 amp. Household style with space for two plugs, or TWO-15 to 20amp outlet plugs)
ITEMS USED: Lights, Cash Register, Refrigeration, Water Pump, Etc.

We do not require any water hook-up (but we will use it if you have it!)

If vendor passes are required, we need 2 (4 at some shows).

If possible, we would like to have space behind, or close to our trailer, to park our truck as it contains our extra refrigeration and dry storage (electricity inc. w/ 30 amps). Please let us know in advance if this is not an option so we can make other arrangements!

Note: We serve off the DRIVERS SIDE of our trailer!!!
