

29.24 FIRE DEPARTMENT ACCESS

29.24.010 Fire Department Access

The Grand Junction Fire Department responds to a multitude of emergencies in various types of buildings and occupancies. To provide effective fire-fighting operations, the Fire Department must be able to reach all structures by way of approved access. Thus, street design and access must meet the requirements established in the current version of the Grand Junction Fire Department Access standards and the locally adopted fire code. The only potential exceptions to the requirements identified in Fire Department Access standards that would be considered are modifications of the Alternative Street Designs (see Chapter 29.68) that are submitted and approved through a formal Design Exception Process (see Chapter 29.64).
